$$90 - 10 = 80$$

3

How were artefacts discovered?

The older boy was making a hole in the sand for the water pot and accidently found it.

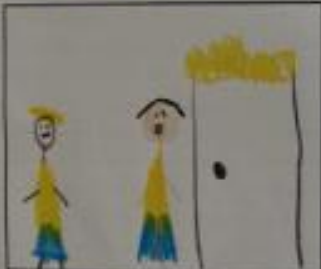

Then he ran to find Howard Carter. He was so happy.

He went there and pretended that he found it when it was a snakehouse he went down.

when he got down he saw a door. The next day he got a metal hook and made a hole.

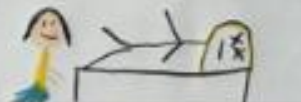

The Egyptians said "yes" and "yes"!

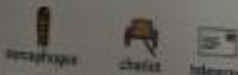

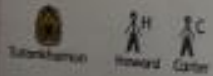

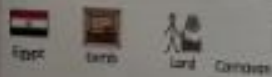

In the night he sneaked in and took 3 things.

The next day he comes with a inspector and pretends he was never there.

then they find the last door and open it and see the tomb.
