

Recognition assembly – Years 4, 5 & 6

2nd October 2026

Tired from Torture ① Aladdin stretched his arms and remembered the ring ~~the~~ that he took, he reached down his pocket for it and rubbed it against his pocket and ... CRASH!
BANG! BOOM!!! The cave erupted.
A petrifying, cold and charging storm had started. Despite the darkness, Aladdin could see it. He could see it appearing through the darkness with lighting around it. "You are my master! What can I do for you?" "Who are you?" ② exclaimed Aladdin.

Enquiry type	Observing over time	Identifying and classifying	Research	Fair and Comparative testing	Pattern seeking	Exploring/ Problem Solving
						
Skills focus	Asking questions and planning enquiries	Setting up and doing enquiries	Observe and measure	Recording	Interpreting + communicating results	Evaluating
						

Would the blue-tac float if it was in smaller pieces?

The raisins were buoyant because the gas bubbles cling to the rough surface area when the particles try to escape the liquid. When the gas particles escape ~~the~~ couldn't float on its own because it makes it sink. This process will repeat all over again. However not if in the surface area was smooth.
