Year 4

The Daring Rescue

Annex to launch the cable Grace
faced ~~to~~ her father's bedside and
informed him of what was taking
place in the storm.

~~He is to danger~~

~~W-N-N-No initiative to add danger~~

~~W-N-N-No initiative to add danger~~
~~W-N-N-No initiative to add danger~~
Grace's father, Wimperling ^{complains} that it was
to dangerous and it normally takes about 5-6
men to control a cable when there wasn't
a storm, but even (by) getting to Grace's
rescue.

but as they worked about of the light
house her father's eyes widened, as the sun
rose it cast the light on the headlight
was of people. ~~jump in to the boat~~ so they
jump in to the cable, ~~and~~ setting off to
Big Harcar Rock.

Year 5

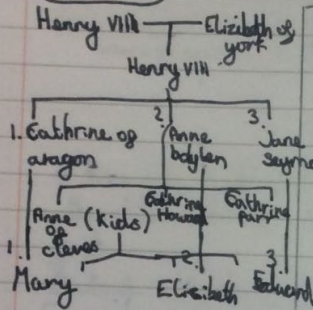

Why is it important to learn about the Tudors?

The vicious Tudors are fun to learn about but there is a reason why. The reason why is the Tudors made and played things like football, and carriages that we still use today. So if you do want to learn about them read this to learn!

Henry VIII

Tudor tree

Royal dynastal dynasty of kings and queens

Henry VII (Henry 7) was the first king of the tudors - Born 1485 Died 1509 - after his death his son Henry VIII (Henry 8) became king. Henry VIII wanted a son with his first wife. But not to his surprise he had a girl. His second wife had a girl too called Elizabeth. His first girl was called Mary. He wanted a boy so he had another wife! And with his luck he had a boy called Edward - King at 9 Died 1553

Religion

Henry VIII

The Tudors all believed in different faiths like: Henry VIII - protestant
Mary - Catholic Elizabeth - protestant.
Catholics were a lot more strict than protestants. Protestants had a head of their church religion called a pope. Where Henry VIII wanted a divorce for Catherine of aragon for Anne boleyen the Pope said he doesn't do divorces so Henry VIII made his own church and made himself head of the church.

FUN FACT

did you know
Mary killed 301
protestants

YIN YANG DRAGONS

The yin yang dragon is a scarce species - ~~there~~ ~~that~~ they're ~~are~~ very little in numbers, but they still prosper as a successful species. These animals have evolved over the years and their most successful stage is their current one.

Appearance

metric or imperial?

Yin Yang dragons are 7 feet long and ^{seven} 11 inches wide. ~~wide~~ ~~They~~ ~~have~~ ~~but~~ ~~just~~ ~~like~~ ~~in~~ ~~every~~ ~~other~~ ~~species~~, there is an ^{anomaly} ~~anomaly~~. One Yin Yang dragon (that is now deeply very old) was ~~reported~~ ^{thought} to be 200 feet tall, but was only seen once and ~~people~~ ^{some} ~~believe~~ ^{people} ~~that~~ ~~it~~ ~~was~~ ~~a~~ ~~hoax~~. ~~That~~ Yin Yang dragons are usually half white and half black, but a rainbow yin yang dragon and a pink yin yang dragon have also been spotted. (Although it was ~~recently~~ ^{recently} revealed that the rainbow one was a hoax) The yin yang dragon also has two antennae and yin yang symbols for eyes.

Habitat

These dragons are known for their mysterious ways. Not much is known ~~about~~ ^{about} their habitat, but theories and ~~many~~ ^{many} years of research have show that these creatures are quite phenomenal - ~~it~~ ^{it} has been filmed - that these creatures have been migrating for many years. They can create beds out of clouds to sleep, and then they go on to ~~live~~ ^{live} their day. When they have finished hunting, they go to the nearest area and create a new bed. In other words they have always been migrating.

Prey and predators

Yin Yang dragons ~~usually~~ usually hunt giant dragons. This may seem ambitious, but they have an interesting method of attack; they fly faster than a speeding bullet and puncture holes through the massive creature's vital organs. Eventually, the creature dies and the yin yang dragon eats it. Unfortunately, Yin Yang dragons are hunted by extremely dangerous creatures: blue phoenixes. Although these creatures are extremely dangerous, the yin yang dragons have adapted to hide and travel in packs to survive.

Life cycle

Yin yang dragons are usually born after 1 month of pregnancy, and after 1 year they can roam free in the wild. (one dragon year equals 5 human years). What makes these creatures unique is that when they are one year old to twenty years old their mind makes them do great things, but from twenty to sixty years old, their mind makes them do great, wonderful deeds. ~~on this phenomenon is still~~ ^{on this phenomenon is still} The reason for this phenomenon is still unknown.

Y

Behaviour solitary creatures enjoy solitude

These creatures enjoy solidarity, but to protect themselves from predators, before hunting they travel in packs of six. After the target is clear, they split up alone to hunt. When they have finished hunting, they return to ~~that~~ ^{that} create a new cloud bed. That is how they ~~like~~ ^{like} strongly, they prefer to socialise with only the yin yang dragons that they usually travel
