

Recognition assembly 22.06.23

Year 4 - Geography

Year 5 - Maths

Q12 of a number is 40. What is the whole number? 160

40	40	40	40	40	40	40	40
----	----	----	----	----	----	----	----

✓

40 ÷ 2 = 20
20 × 8 = 160

Q13 of a number is 3. What is the whole number? 25

3	3	3	3	3	3	3	3
---	---	---	---	---	---	---	---

✓

3 × 5 = 15
15 × 5 = 25

Q14 of a number 36. What is the whole number? 72

36	36	36	36	36	36	36	36
----	----	----	----	----	----	----	----

✓

36 ÷ 2 = 18
18 × 4 = 72

Q15 of a number is 125. What is the whole number? 25

125	125	125	125	125	125	125	125
-----	-----	-----	-----	-----	-----	-----	-----

✓

125 ÷ 5 = 25
25 × 5 = 125

Q16 of a number is 235. What is the whole number? 47

235	235	235	235	235	235	235	235
-----	-----	-----	-----	-----	-----	-----	-----

✓

235 ÷ 5 = 47
47 × 5 = 235

Q17 of a number is 24. What is the whole number? 6

24	24	24	24	24	24	24	24
----	----	----	----	----	----	----	----

✓

24 ÷ 4 = 6
6 × 4 = 24

Q18 of a number is 45. What is the whole number? 9

45	45	45	45	45	45	45	45
----	----	----	----	----	----	----	----

✓

45 ÷ 5 = 9
9 × 5 = 45

Q19 of a number is 12. What is the whole number? 6

12	12	12	12	12	12	12	12
----	----	----	----	----	----	----	----

✓

12 ÷ 2 = 6
6 × 2 = 12

Q20 of a number is 15. What is the whole number? 3

15	15	15	15	15	15	15	15
----	----	----	----	----	----	----	----

✓

15 ÷ 5 = 3
3 × 5 = 15

Year 6 – Non-chronological reports

The Kulidimaheedily

Introduction
 Vicious. Deadly. Cunning. This creature would do anything to kill its prey. The Kulidimaheedily is scared of one thing and one thing only. Vampires. The creature has been found in Japan in 2020.

Appearance
 It has a devilish red eye which haunts you till death. These long redish arms are 5 feet long and will catch you in a click. It has short legs but is still faster than a car.

Habitat
 This magnificent creature was found in an island in Japan called Sado. This island is mostly forest but to the Kulidimaheedily, it's the best type of habitat imaginable. Sleeping on the cold and wet grass is what it likes.

Special abilities.
 This animal can see in the dark and has skin that can warm itself up when it's cold. This Kulidimaheedily can shorten his arms and make his arms longer so it can catch its prey.

Ecentihog

Have you ever heard of the Ecentihog? It is an incredible creature with sharp spikes, a back and hundreds of legs. There are around 40000 left in the world and they can live up to a whopping 300 years! Their large back and small ears can allow them to smell and hear from hundreds of miles away.

Appearance
 The Ecentihog is known for its spikes and large number of legs. Their huge number amount of limbs can range from 100-200 legs. On each Ecentihog, its sharp back makes it easier to break larger bugs apart.

Habitat
 Ecentihogs natural are in rain forests; however they can be found near lakes, rivers and swamps. They like to living near cool, wet places. They come in small groups and will move around.

Did you know?

Did you know?

Diet
 The Ecentihog has very few predators and its diet mainly consists large bugs or beasts. Its legs are very short and sharp which means it is easier to kill hard shelled and smaller bugs.

Time for the lolly-stick
children! What have you
achieved this week?
