17th November 2023

Year 2 Maths

Adding differences to compare items.
The programme shows the number of cars parked on each day.

Day	Number of cars parked
Monday	4
Tuesday	2
Wednesday	8
Thursday	2
Friday	4
Saturday	10
Sunday	8

How many more cars are parked on Saturday than Friday?

What is the difference in the number of cars parked on Monday and Sunday?

How many more cars are parked on Thursday than on Wednesday?

The programme shows the number of cars parked in a car park.

Day	Number of cars parked
Mon	5
Tue	4
Wed	7
Thurs	1

How many more cars are parked than Mon?

What is the difference in white parked cars and yellow parked cars?

How many more white cars are parked than blue?

Can you write your own difference questions for this programme? Can a friend answer them in your book?

Color	Count
Blue	2
Yellow	5
White	7

11 - 4 = 7

7 - 2 = 5

5 - 1 = 4

7 - 4 = 3

Year 3 Maths

9.10.21 Addition and subtraction by partitioning

543

```

  graph TD
    A((543)) --- B((500))
    A --- C((40))
    A --- D((3))
  
```

$543 - 500 = 43$
 $543 - 500 = 40 + 3$
 $543 - 400 = 143$
 $543 - 400 = 100 + 40 + 3$
 $543 - 500 = 40 + 3$
 $543 - 500 = 43$
 $500 + 40 + 3 = 543$

875

```

  graph TD
    A((875)) --- B((800))
    A --- C((70))
    A --- D((5))
  
```

$875 - 800 = 75$
 $875 - 800 = 70 + 5$
 $875 - 800 = 70 + 5$
 $875 - 70 = 805$
 $875 - 70 = 800 + 5$
 $875 - 5 = 870$
 $875 - 5 = 870$

Addition and subtraction by partitioning

437

```

  graph TD
    A((437)) --- B((400))
    A --- C((30))
    A --- D((7))
  
```

$437 - 400 = 37$
 $437 - 400 = 30 + 7$
 $437 - 400 = 30 + 7$
 $437 - 30 = 407$
 $437 - 30 = 400 + 7$
 $437 - 7 = 430$
 $437 - 7 = 430$

575

```

  graph TD
    A((575)) --- B((500))
    A --- C((70))
    A --- D((5))
  
```

$575 - 500 = 75$
 $575 - 500 = 70 + 5$
 $575 - 500 = 70 + 5$
 $575 - 70 = 505$
 $575 - 70 = 500 + 5$
 $575 - 5 = 570$
 $575 - 5 = 570$

Year 3 History

All about **ANCIENT EGYPT**

Introduction
Egypt is in north Africa. Egypt is in a small area of north Africa next to the Nile. Ancient Egypt lasted from 31 three thousand BCE to thirty BCE. In the Bronze age and the Iron age. Ancient Egypt did stay but lots of Ancient Egyptians worked as things like slaves, farmers, and priests and more, you'd had to have to start working when you were 12!

gods and goddesses

The ancient Egyptians did not know that why the sun came up and why trees grew bigger and things like that so they thought gods were responsible for that. They believed over 3000 gods and goddesses. These are some of them: Hapi god of the Nile, Sekhmet goddess of war and fighting, Ra/Rah god of the sun, Bastet goddess of cats, Thoth a scribe (reading and writing), Isis goddess of humanity and healing, Osiris god of the after life and anubis who would see if you were worth going to the after life. That just 8!

Mummification

The Ancient Egyptians believed in the after life. The after life is a second life after you died. They believed anubis was in charge of the after life. Before you went to the after life. The ancient Egyptians made mummies. They would take to open your tummy and take out your liver, lung, stomach and your intestines out and put them in canopic jars each for a different part each. The rest of the body parts were thrown away but the heart wasn't they kept because they said that you could find your human form when you went to the after world again. First they would wrap the person around in mummy.

AMAZING ANCIENT EGYPT !!!!!

This is Africa. In the North of Africa is Egypt and that's where lots of mysterious things happened and that's what we're going to talk about in this double page spread. Egypt is next to the Nile and that's handy because the people who live in Egypt use it to water their crops.

These are the gods of Ancient Egypt the reason why they have so many gods is because they didn't know anything so they relied on gods and goddesses to know. Ra is the most important god he is the god of the sun.

These are the pyramids - they Egyptians built them. The biggest one they built is in Giza. Some are made out of lime stone.

These are hieroglyphics they are a type of handwriting that the Egyptians used. This is Egypt in hieroglyphs:

This is the mask of Tutankhamun he was found when a little water boy was playing in the sand and hit something hard he told Howard Carter he told his workers to dig and after a few days they found twelve more steps then they found a tunnel that lead into a room the room had lots of different things in it but Howard Carter was worried because he couldn't find Tutankhamun's tomb. Then he found another room at that night.

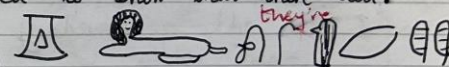

These are canopic jars the Egyptians use them to store lots of things including the liver in. Did you know when you die they mummy you and weigh your heart if your heart is lighter than a feather you are sent to the after life because you have a kind heart but if it's way more than the feather you are mean and you stay dead.

This is a map of Egypt it shows you where everything is. The green part shows you where the crops are growing next to the river Nile. Did you know? the Egyptians call the river Nile An which means black because the river Nile's mud was almost black.

This is a mummified body in a tomb. Did you know to show that people or gods are dead or not is that if there dead on there tombs or the pictures of them they have a curved beard to show that they're dead?

GLOSSARY

Canopic jars = jars that people store the liver, lungs, stomach and liver in

Tutankhamun = a very demanding pharaoh

pyramids = a pyramid shaped thing that is mostly made out of lime stone

crops = plants that you can eat and grow by the Nile
