

An abstract graphic featuring several overlapping, thick, curved lines in shades of green and blue. The lines are arranged in a way that suggests a stylized 'e' or 'u' shape, with the green lines on the left and blue lines on the right. The background is white.

clank

ser chant like seen ~~It~~ ~~Ting~~, clash, clang! The birds wonder-  
gull singing was interrupted by a discord-  
ant screech. Emerging from the clouds,  
a jet black metal construction sped th-  
rough the sky, ripping it like a menace

## Repairing The Boat

13.3

1. Improve this sentence by improving the 'what doing' and the dialogue.

How does Lucy dash? What does she need to do to the boat?

briskly

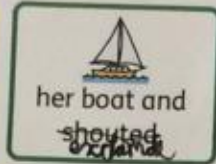

patched up

Lucy

Lucy dashed to

her boat and

shouted "I can do this. Let's get you"

2. Improve this sentence by adding the 'what'

What can you compare the Moon to?

She

saw

the snapped mast,

shaking in the wind.

snapped

snapped

snapped

fractured

3. How does Lucy repair the boat?

tough

tough

tough

Lucy ~~immediately~~ dashed to her boat and exclaimed "you can do this!" Lucy.

She turned her head to see the snapped mast shaking in the wind.

Lucy stumbled to grasp the scraps of the boat.

She lashed the scraps of wood together to ~~separate~~ the boat in one.

The mast swung-kicking Lucy off her boat...

Lucy knows it would be ~~with~~ <sup>tough</sup> repairing the boat.

She reached for the rope and swung it with a monsters grip.

The rope grasped the mast and in seconds was repair it.

The boat looked brand new by the time she was done.

Through the obscured lens of her scratched, scuzzed telescope, the extraordinary outline arced towards her, throwing up glittering, salty sprays. It hit Lucy in the face, but she didn't mind. She was staring bug-eyed as the shadow leapt above sea level, its inky tail thrashing in the air. As day turned to night, the black figure kept Lucy transfixed as it jumped and splashed. She wiped her telescope gently with her sleeve and peered through again, staring and staring at the tar-black silhouette crashing and splashing in the salty sea, weaving in and out of gouging waves. The moon was a shining beacon in the lonely sky. It guided Lucy's awe-struck gaze to the loping whale. Lucy glanced in up to the pitch-black sky, where the stars hung like diamonds.

She glanced at her grubby clothes, wondering how strange she must look to this gentle giant, how dirty and unkempt she must appear. She scrubbed grievously at the telescope lens and gazed down on the giant gargantuan creature. It had completely grasped her.

As Lucy stood transfixed by the giant, she could almost hear it speaking to her... but was it imagination or not? "Come with me," the whale's voice <sup>said in</sup> was deep and laden with honey. "I've been here for all time. I know you. I know why you came here. Uncover my mystery. Uncover my past. To some, I am a legend, to others, I'm just a story, to tell their young. I remember the Great Fire. I remember the Vikings. I remember it too much, and I wish to share it with you, Lucy, adventurer of the sea." The It said The whale turned in the water, creating a soothing lapping sound. It fixed its beady eyes on Lucy. I remember Edith.

# Year 6

vampires don't just live in the shadows  
The shadows whispered secrets as he  
crept along the hard stone of the chapel  
floor. ~~down~~ <sup>down</sup> to the crypt he went dragging  
his latent kill with him: a deer. <sup>He</sup> he  
hauled it down the stairs as it left  
a steady stream of blood in its  
wake where he had pierced its neck.  
He was zone, zone the vampire.

The next day at school, zone was  
drifting as in another boring  
maths lesson. "Help <sup>help</sup> stay awake" dexter  
whispered in his ear. "Why <sup>why</sup> do you have  
blood on your shirt?" he asked. "I'll tell  
you at lunch" said zone.

dexter and zone danced as there  
satanic song came on: <sup>turning the dinner</sup>  
"I can't believe you're a vampire" suddenly  
time seemed to slow as everybody picked  
up a nife and charged at zone  
"sanny" whispered ~~zone~~ dexter as ~~the zone~~  
bared his fangs and charged them. 30  
minutes later everybody was dead except  
zone. He glen away never to be seen  
again.

## Africa's population

1. What do these maps show about where areas of high and low population density are found in Africa?

Equator, biome, transport, coast, vegetation, rainfall, trade, rivers/lakes, resources, temperature. These maps show that... Most of the population of Africa can be found... because... High population density can also be found... because... The reason why population density is low in... is because...

2. What conclusions can we draw from this satellite image of Europe and Africa at night?

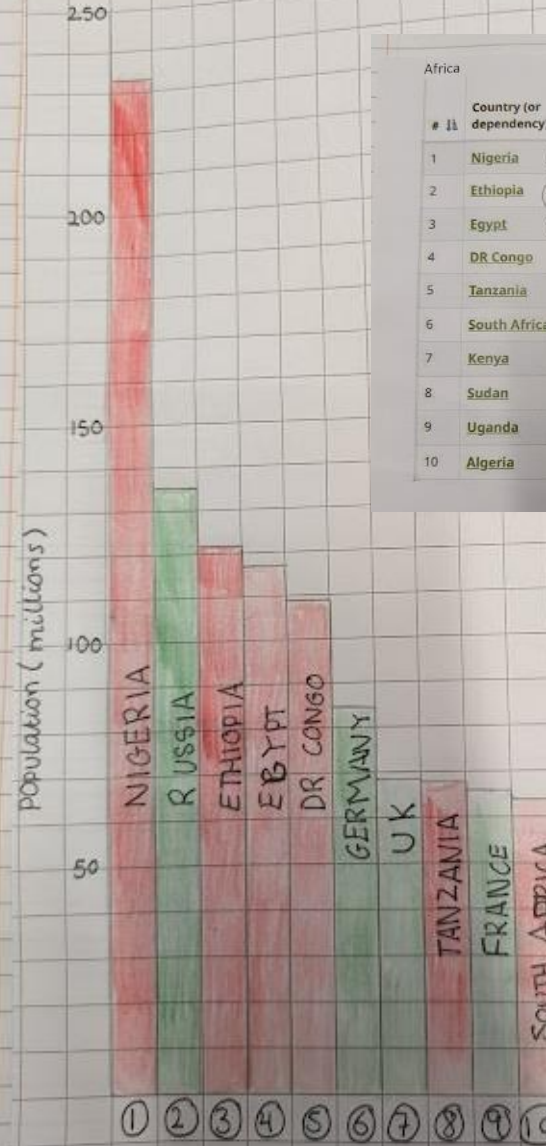

Europe, Africa, continent, area, size, population density, light, cities, electricity, biomes, climate, temperatures. Even though Africa is more populous than Europe, this map shows that... In terms of size, Europe is... which means that... In contrast to Europe, Africa has...

1) The maps show that the most populated areas in Africa are near to large rivers and coastlines as there are lots of resources there. These areas can also be beneficial for importing and exporting goods for trade. Other areas that are sources of high density in population are found in the biomes; deciduous forest and tropical rainforest. This is because there is a lot of rainfall and vegetation. Areas of low population are found mainly in the Savanna and desert biomes as they are near the three main lines of latitude (eg. Equator, Tropic of Cancer, Tropic of Capricorn), and the heat is sweltering and there is little transport.

2) Even though the continent of Africa is more populous than Europe, the continent of Europe has a higher population density than Africa. This is due to the fact that the climate in the desert is too hot to live in and there are fewer water sources and most of the people are in better water biomes (where there are more water sources). Africa also has the larger area regarding size but you also find lots of people in the major cities. People also see clearly as which city has the most lights but some areas in Africa are not yet developed enough to see electricity.

## Top 10 most populous countries in Africa + Europe

Red = Africa  
Green = Europe

Africa			Europe		
#	Country (or dependency)	Population (2024)	#	Country (or dependency)	Population (2024)
1	Nigeria	232,679,478	1	Russia	144,820,423
2	Ethiopia	132,059,767	2	Germany	84,552,242
